

Problem Overview

- **Fragmented Connections:** Entrepreneurs, investors, and businesses face challenges in establishing valuable relationships.
- **Underutilized Storage:** Small businesses have difficulty accessing affordable storage options.
- **Ineffective Financial Oversight:** Shopkeepers lack adequate tools for monitoring transactions and producing reports.
- **Inadequate Networking Solutions:** There is no efficient platform available for exchanging proposals and facilitating collaboration.

TEAM NAME: JONNE YOUJJ KARO

INNOVATION AND UNIQUENESS

INNOVATION AND UNIQUENESS

- **Unified Platform:** Connects entrepreneurs, investors, shopkeepers, and warehouse owners.
- **KhaataBook:** Manage daily transactions with auto-generated reports.
- **Smart Networking:** Proposals, chat features, and advanced filters to finalize deals.
- **Warehouse & Marketplace:** Optimize storage rentals and bulk orders for better efficiency.
- **Seamless Integration:** Combines all key features into a single platform, addressing the challenges these entities face with collaboration, transactions, and space management.

FEASIBILITY AND VIABILITY

Scalable Market Potential

- **Technical Feasibility:** Leverages secure, scalable technologies like Hyperledger-Fabric, Redis and Google Cloud a for seamless web and mobile functionality.
- **Operational Feasibility:** User-friendly design ensures smooth adoption and integration into existing alumni processes.
- **Financial Feasibility:** Cost-effective with strong potential for increased engagement, donations, and a solid return on investment.

Revenue Streams

- **Technical Feasibility:-** Subscription plans for advanced features (e.g., KhaataBook reports, event management tools).
- **Operational Feasibility:-** Transaction fees for proposals, warehouse rentals, and marketplace orders.
- **Financial Feasibility:-** Sponsored listings for businesses to promote products or services.

Focus on Rural Businesses

- Our platform is designed with a strong emphasis on supporting rural businesses, providing them with the tools they need to overcome common challenges.
- One key feature is warehouse inventory renting, allowing small businesses to easily access affordable storage space. This helps eliminate the problem of limited storage, a major hurdle for growing rural enterprises.
- Additionally, the “Khaata” feature offers a digital transaction ledger, enabling shopkeepers to track daily sales, manage customer transactions, and generate automated reports.
- This simplifies their financial management and helps them make better-informed decisions, all in one easy-to-use system.
- By addressing these critical issues, we ensure that rural businesses can thrive without the constraints of space or inefficient financial tracking.
